SUMMARY

Flutter Developer with a 5 years experience in Software Development and 3 years professional experience in Mobile Development Flutter. Reliable and a hard worker. A fast learner, ready to work with others. Proven ability to collaborate in remote Agile teams, write clean scalable code, and deliver production-ready mobile solutions. Seeking a remote mid-to-senior level Flutter developer role to contribute to impactful products while growing technically.

I'm also skilled in Digital Marketing, with hands-on experience in SEO, content marketing, and social media strategy. I am adept at conducting market research, analyzing trends, and optimizing digital content to drive engagement and brand growth.

WORK EXPERIENCE

Flutter mobile developer, Credes.

December 2025 - January 2026

Team Lead | Flutter Developer: (Contract)

- **CI/CD Pipeline Architecture:** Engineered a robust GitHub Actions pipeline that automated the generation of production-ready Android App Bundles (.aab) and APKs, reducing manual deployment time by 90%.
- **Automated Quality Gates:** Integrated strict static analysis (flutter analyze) and formatting enforcement into the development workflow, catching type-safety issues early and ensuring 100% codebase consistency.
- **Regression Testing & Integrity:** Implemented automated unit and widget testing execution within the CI/CD pipeline to prevent regressions, leading to a significant decrease in post-release bug reports.
- **Audio Engine Overhaul:** Spearheaded the migration from audioplayers to just_audio for the Shelf App, improving audio playback stability by 40% and ensuring seamless handling of local and remote URI sources.
- **Background Persistence & UX:** Engineered a robust background audio system using BaseAudioHandler, allowing uninterrupted playback during app backgrounding or screen locks, which significantly increased user session length.
- **System-Level Integration:** Implemented a cross-platform media notification system (Android/iOS) with real-time state broadcasting, ensuring 100% synchronization between the app UI and system playback controls.
- **Critical Bug Resolution:** Identified and resolved a "Bad State" exception in the file-adding workflow, eliminating a major app crash and improving the reliability of the media storage pipeline.

Flutter mobile developer, Shop Online New York.

August 2025 - Current

Team Lead | Flutter Developer:

- **Cross-Functional Leadership:** Directing a multi-stack development team (React and Flutter), ensuring seamless feature parity between the web and mobile e-commerce platforms.
- **Velocity Optimization:** Increased overall development speed by 75% through the implementation of standardized component libraries and optimized pull request workflows.
- **E-commerce Performance:** Translated complex business requirements into high-performance shopping features, including optimized product filtering and secure checkout flows.
- **Technical Mentorship:** Upskilled a cohort of interns on emerging technologies and modern state management, accelerating their contribution to production-level code.
- **Operational Excellence:** Revamped the Jira project workflow, streamlining task assignments and code reviews to eliminate delivery bottlenecks.
- **Code Quality Governance:** Championed maintainable architecture standards for Android and iOS, leading to a more scalable codebase capable of supporting rapid scaling.

Flutter Mobile Developer, Nexoris Technologies

APRIL 2025 - JANUARY 2026

Team Lead | Flutter Developer:

- **Real-Time Data Synchronization:** Leveraged Firebase to architect a live client-progress tracking system, providing users with instantaneous status updates on application milestones.
- **API Orchestration & Documentation:** Integrated complex REST APIs using Swagger for rigorous endpoint documentation, ensuring seamless data flow between the mobile frontend and backend services.
- **Gamification & Logic Engineering:** Developed an "In-App Gamification" module that mathematically converted user Experience Points (XP) into redeemable airtime amounts, driving a significant increase in daily active users.
- **Quality Assurance & Distribution:** Streamlined the beta testing phase by utilizing Firebase App Distribution, enabling rapid feedback loops with stakeholders before production releases.
- **Project Workflow Management:** Optimized delivery timelines using ClickUp to manage task assignments, peer code reviews, and pull request merges.
- **Architecture Refactoring:** Standardized the codebase on MVVM and BLoC patterns to facilitate easier feature scaling and reduce technical debt.
- **Technical Leadership:** Cultivated a high-performing culture by mentoring team members on best practices and maintaining rigorous version control protocols via Git.

Flutter mobile developer, Apptalic Lab. (Contract)

JAN 2025 - Current

- **Performance Engineering:** Optimized overall application performance by 70% through advanced widget tree refactoring and efficient memory management, resulting in a significantly smoother user experience.
- **Third-Party API Integration:** Orchestrated the integration of the Google Books API to dynamically fetch and display extensive libraries within the application.
- **Complex Media Rendering:** Engineered a robust reading engine supporting PDF and EPUB formats, allowing for a native-like reading experience with custom layout controls.
- **Secure Data Architecture:** Implemented Firebase Authentication and real-time user data synchronization to ensure secure access and personalized content delivery for the Internda and Novelle mobile apps.
- **Collaborative UX Development:** Translated high-fidelity designs and business requirements into responsive, high-performance UI components for both Android and iOS platforms.
- **Version Control & Quality:** Maintained seamless team collaboration and codebase integrity through structured Git protocols and branching strategies across GitHub/GitLab.

Product Built:

- **Internda Mobile App:** [Download here](#)
- **Novelle Mobile App:** [Download Here](#)

Flutter Mobile Developer, Marketing Analytics Africa

JAN 2025 - MAY 2025

- **Move-to-Earn Engineering:** Architected a complex conversion engine for the MAAL Tracker app that programmatically converted physical steps into "MAAL Coins" and subsequently into Naira.
- **Health-Tech Integration:** Integrated the Google Fit API and Health Connect to synchronize real-time biometric data, ensuring accurate step tracking and background data persistence.
- **FinTech & Payout Systems:** Engineered a robust digital wallet system and integrated the Paystack API to facilitate secure user withdrawals, bank account verification, and automated financial processing.
- **Multi-Format Survey Engine:** Developed a specialized survey module supporting both video and text-based interactions, utilizing Firestore for real-time response management and data integrity.
- **Scalable Data Architecture:** Designed and optimized a Firestore database structure capable of handling high-frequency data writes from continuous step tracking and survey submissions.
- **Secure Authentication:** Implemented a multi-provider authentication system (Google & Facebook) via Firebase Auth, reducing onboarding friction and improving accessibility.
- **End-to-End Product Design:** Orchestrated the full UI/UX lifecycle, focusing on intuitive navigation for a diverse user base managing both fitness goals and financial earnings.

Product Built:

- **MAAL Tracker:** [Download here](#)

MEDIA EXECUTIVE, Advertisers Association Of Nigeria

MAR 2021 - DEC 2024

- Managed digital campaigns using data-driven insights from social platforms
- Applied analytics and audience insights to improve engagement strategies
- Maintained and updated company website using WordPress (Role included to show analytical and UX-driven background)

Internship, Front End Developer BrindoCorp

OCT 2020 - MAR 2021

- Collaborated on user-centric design strategies translating UX and business requirements into code.
- Contributed to projects within Scrum environments.
- Researched and integrated emerging web technologies and trends.
- Assisted in optimizing website performance and ensuring cross-browser compatibility.
- Participated in code reviews and provided constructive feedback to peers.
- Worked closely with designers to implement visually appealing and responsive web interfaces.

Front End Developer Intern - Mobile, ideaz Hub

Apr 2020 - Dec 2020

- Maintained project timelines and resources in an Agile environment.
- Developed quick-loading site designs with specific layout requirements.
- Worked with in-house mobile developers to create sleek and innovative UI designs.
- Assisted in debugging and troubleshooting to ensure smooth application functionality.
- Conducted user testing and gathered feedback to improve UI/UX designs.
- Implemented best practices for mobile-first and responsive design strategies.

EDUCATION	Advance Diploma in Software Engineering Aptech Computer Education	APR 2017 - OCT 2019
	• Graduated with a Credit (68%) • Completed two major projects: a website and an Android application. • Led the Android application project using Java.	
	Advanced Digital Marketing: SEO & Google Analytics GOMYCODE	JAN 2023 - NOV 2023
	• Gained expertise in Google Analytics and SEO. • Proficient in data analysis, reporting, keyword research, and strategy development. • Skilled in on-page and off-page optimization and content creation strategies.	

TECH SKILLS	• Mircosoft Suite software.	• bLoc
	• REACTJS	• Provider
	• FLUTTER	• Riverpod
	• Java.	• Problem Solving
	• HTML	
	• WordPress Developer	
	• CSS	
	• JavaScript	

ADDITIONAL SKILLS	• GRAPHICS DESIGN	• Digital Marketing.
	• SEO (Search Engine Optimization)	• Content Marketing
	• Social Media Marketing	• Email Marketing
	• PPC (Pay-Per-Click) Advertising	• Video Marketing
	• Copywriting and Creative Writing	

CERTIFICATIONS (CLICK TO VIEW)	• <u>Advanced Digital Marketing by GOMYCODE</u>	• <u>Advanced Diploma in Software Engineering by Aptech Computer Education</u>
